— Abstract —

OFFICEVERSE is not just a token — it is a multiverse economy governed by the community.

Officeverse is a decentralized economic ecosystem inspired by a future where humans break free from the traditional office model. 2035 marks a major societal transformation: people abandon the rigid office system and enter an Inter-Office Multiverse network where work is no longer location-dependent, cities exist within an economic multiverse, interstellar resources are harvested using technology and AI, and travel, learning, and work happen across cities.

At the center of the ecosystem is \$OFFICE — the common currency used for transactions, transfers, storage, and trading throughout the entire network.

— 01 —

Introduction

For over 100 years, the human work model has barely changed. Billions of people still live in the same loop:

- ▶ Wake up
- ▶ Commute to office
- ▶ Work for salary
- ▶ Repeat

This system creates:

- ▶ Dependence on employers
- ▶ Geographic limitations on work
- ▶ Centralized financial systems

Blockchain opens up the possibility of building a new model. Officeverse was created with the goal of redefining the concept of "office". In Officeverse, the office is no longer a stationary building — the office becomes a universe.

— 02 —

The Problem

Centralized Work Structures	Work is tied to a specific location.
Limited Economic Access	Many people do not have fair access to the financial system.
Geographic Restrictions	People are limited by their country and city.
Financial Friction	International money transfers are costly and slow.

These problems make it difficult for society to move toward a truly global economy.

— 03 —

The Officeverse Solution

Officeverse proposes a new model: Inter-Office Multiverse Network. In this network:

- ▶ Cities exist within an economic multiverse
- ▶ People can work anywhere
- ▶ Resources can be harvested beyond Earth
- ▶ The economy operates on blockchain
- ▶ Income is fixed and universal

— 04 —

The Officeverse Multiverse

Officeverse consists of many different cities within the same ecosystem.

Crypto City	The financial hub of Officeverse. All transactions use \$OFFICE.
Inter-Office Network	Decentralized office network. Work from any city, collaborate across the multiverse, join global projects.
Resource Galaxy	Economic zone for interstellar resource extraction: cosmic energy, rare minerals, extraterrestrial materials.
Tourist Universe	Multiverse tourism ecosystem. Move between cities, experience new civilizations, work and travel simultaneously.
Tech City	Technology hub: AI, blockchain, robotics, space tech, mining research.

— 05 —

The Officeverse Economy

At the center of the ecosystem is the token: \$OFFICE. This token is used for:

- ▶ Service payments
- ▶ Goods exchange
- ▶ Transfers between cities
- ▶ Value storage
- ▶ Trading on crypto markets

\$OFFICE — the official currency of the Officeverse multiverse.

— 06 —

Universal Basic Salary

Every Officeverse member receives: 1 OFFICE / month

Goals:

- ▶ Ensure everyone has the right to participate in the economy
- ▶ Encourage community growth
- ▶ Create a sustainable economic foundation

— 07 —

Tokenomics

Token	Ticker	Total Supply	Chain
OFFICEVERSE AI	\$OFFICE	1,000,000,000	Base

#	Allocation	Dist.	Lock	Description
1	Owner	10%	12M	Core team — strategy & long-term growth
2	Treasury	5%	—	Long-term reserve & ecosystem stability
3	CEX Listing	5%	12M	Liquidity for CEX listings
4	Liquidity Pool	5%	12M	Initial DEX liquidity
5	Airdrop	5%	—	Early supporters & community campaigns
6	Marketing	8%	—	KOLs, influencers, communications
7	Trading	8%	—	Market making & trading liquidity
8	Community & Public	8%	—	Community rewards & incentives
9	Staking	6%	12M	Staking rewards for token holders
10	Accounting	8%	12M	Operations & financial management
11	R&D	8%	12M	Technology research & product dev
12	Factory & Mining	8%	12M	Ecosystem products & partners
13	Governance & Tax	8%	—	Governance mechanisms & community voting
14	AI	8%	12M	AI technology & agent development
15	Other Traders	—	—	Traders and investors participating in the open market

Lite individual tax	Liquidity locked	Ownership renounced
---------------------	------------------	---------------------

— 08 —

Governance & Community

Officeverse is governed by the community. Core principles:

- ▶ Transparency
- ▶ Decentralization
- ▶ Community discipline

Community rules are strictly enforced to protect the ecosystem, prevent spam and fraud, and maintain order within the multiverse.

— 09 —

Universe Map

Crypto City

Capital of Officeverse. Features: crypto trading, digital economy, startups, DAO governance. Currency: **\$OFFICE**

Inter-Office Network

A decentralized office network. Users can:

- Work from any city
- Collaborate across the multiverse
- Join global projects

Tech City

Technology hub. Research areas: AI, blockchain, robotics, space tech, mining.

Resource Galaxy

An economic zone focused on interstellar resource extraction. Advanced technologies will be used to harvest:

- Cosmic energy
- Rare minerals
- Extraterrestrial materials

Payment: **\$OFFICE**

Tourist Universe

Multiverse tourism ecosystem: travel between cities, experience new civilizations, explore the multiverse that work, study, and travel simultaneously

— 10 —

Roadmap

Phase 1 — Foundation	Launch \$OFFICE token Build community Establish Crypto City narrative
Phase 2 — Expansion	Launch Inter-Office network concept Community governance proposals Multiverse city development
Phase 3 — Ecosystem	Tourism universe concept Resource galaxy narrative Web3 partnerships
Phase 4 — Officeverse Economy	Cross-chain integrations DeFi utilities Global Officeverse ecosystem
Phase 5 — Launch on CEX	Tier 2 CEX listing Major marketing push Global brand expansion

— Conclusion —

The future is borderless.

In 2035, the world changes. People are no longer limited by offices, nations, or old systems. A new economy is born — one where you can work, travel, learn and build across the multiverse. The key to this ecosystem is: OFFICEVERSE AI (\$OFFICE).
